EAST EXTENSION OF BIG FOUR LEDGE OPENED UP ON 200 FOOT LEVEL

Special to the Bonanza

MANHATTAN, Sept. 17.—In an east extension of the ledge of the Big Four mine, on the 200-foot level, a width of 50 feet of ore was opened up during the past week and the general average of it is \$25 a ton. It is the biggest and most important discovery in Manhattan since the development of the Big Four glory hole.

The distance from the shaft is 300 feet and it is far beyond where any previous openings underground had ventured. The ore previously had been opened considerably in that direction, this having been done since the Steen-Poak-Cicala lease had been purchased for \$30,000 by the company. That portion of it was not known to the leasers, much less the present strike of 50 feet that will break at a rate of \$25.

Also in the bottom of the glory hole and close to the sides of it, good pinnings are being obtained all through. There has proven to be a

"JENKS" HIRSH BLISS Proprietors

much larger width to the ledge than that taken out in the glory hole. One such panning secured Thursday by Superintendent E. C. Maguire showed a valuation of \$200 a ton.

Now that the new pump has been installed and that work is out of the way so as to not interfere in the shaft with hoisting, the raise from the 500 to the 400 level is being completed. By the time this reaches the readers of this paper it will have been completed. The values in the raise have been uniform at about \$15 a ton, with nothing but ore anywhere within its confines.

The announcement of the company from Goldfield that the 150-ton mill will be rushed to completion and placed in commission on or before January 1, is followed up quickly by an order having been placed for all the lumber required in the erection, with the Wittenberg Warehouse and Transfer company. This will be moved out from Tonopah as rapidly as teams can bring it.

The find of this immense tonnage of new ore on the 200 will tend all the more to hasten the coming of the mill.

AMUSEMENTS

Butler Theater

At the Butler theater this evening the usual entire change of program will be shown, four pictures, as follows: "Holding the Fort," an Edison comedy; "The Sheriff's Daughter," Lubin western drama; "The Black Sheep," one of the Vitagraph's best productions, and a feature Biograph entitled "The Inner Circle." The "inner circle" is merely a phrase used by a society for promoting the payment of money, funds to be left under some rose bush at a time designated by the inner circle. The climax of this picture comes just before a dynamite bomb explodes. It is a picture that is good in little things and it also has a well made plot; but the explosion didn't get over. This was because there wasn't enough explosive material in the bomb. The producer wanted to have it go off almost as soon as it left the hands of the villain who has become a hero, and didn't dare make it dangerous. The best way is not to have any powder in the fused bomb and to explode a cartridge at the right time and in a safe place by electricity. When that is done one feels that the bomb was real. The picture's strength comes from good acting. Mary Pickford has the chief lady's part; but the interest centers in one of the gang and his child. Tomorrow, Pathe's Weekly.

CONSOLIDATED AUTO COMPANY

Carrying United States mail and express makes daily trips from Tonopah to Manhattan and Round Mountain. Cars leave Tonopah daily on arrival of mail and leave Manhattan at 2:30 p. m.

W. C. HARDING, Agent.

If you "Keep Boarders" at all, why not keep enough boarders to make it pay? A small campaign of classified advertising in the Bonanza will keep you busy.

Have you a house to rent? Advertise it in the want ad column.

RICH STRIKE IN KENDALL-DOUGLAS MADE IN RAISE

EXCELLENT VALUES ARE SECURED FROM LEASE ON MANHATTAN CONSOLIDATED

Special to the Bonanza

MANHATTAN, Sept. 17.—The rich strike in the Kendall-Douglass lease on the Manhattan Consolidated is holding its own admirably. At a height of 25 feet in the raise the ore is rich and the shoot is as persistent as ever. An assay from 18 inches along the hanging wall side gave a return of upwards of \$600.

This is from the east ledge on the contact as previously described.

It also has been stated that the same hard black lime quartz had been tapped in the south drift and that it was believed by Superintendent Moody that the rich shoot raked to that point. That theory holds stronger than ever in his mind, as during the past week the same ore is there and has shown up in greater quantity than before.

In both cases there is a hard black quartz that assays high and a reddish brown mud that also is rich but secondary in value to the other.

A 50 ton milling test was run during the past week at the War Eagle mill. It came from various workings in the lease, having been a general mixture, and gave a return of between \$46 and \$47. The millings will come thick and fast here after as the facilities are limited so that each bit of ore must be gotten out of the way to make room for the next one.

For quick results try the want ad columns of the Bonanza.

NITRO CLUB Steel Lined SHOT SHELLS

Cut down the lead
— Cut down the guesswork

Shoot the speed shells and watch your field and trap average climb.

The steel lining gives the speed—grips the powder charge with just that compression needed to put all the drive of the explosion behind your lead.

And with Expert Factory Loading, you're sure of the same speed—a uniform spread of pattern in each and every shell. Shoot Arrow and Nitro Club steel lined Expert Factory Loaded Shells for speed plus pattern in any make of shotgun.
